7. 'The reading from the *Collationes* or lives of the Fathers, which St. Benedict (*Regula* xlii, see 6 b.) instituted in his monasteries before compline' (*Dict. Chr. Antiq.*).

Whether the name actually originated in the *Collationes Patrum* read on these occasions does not appear certain. Already in Isidore, *a* 640, the name is simply *collatio* (*Regula S. Isidori* c. viii, 'ad audiendum in Collatione Patrem .. ad collectam conveniant .. Sedentes autem omnes in Collatione tacebunt nisi,' etc. Du Cange). By Smaragdus *a* 850, and Honorius of Autun (*c* 1300), the *collatio* is explained as being itself a conference of the monks upon the passage read, 'aliis conferentibus interrogationes, conferunt alii congruas responsiones'. (See Du Cange.)

1387 TREVISA *Higden* (Rolls) VI. 121 After þe nyȝt collacioun sche wook anon to þe day. *Ibid.* VII. 373 He wolde be at þe colacioun of monkes, and made þe general confessioun wiþ oþere. 1450-1530 *Myrr. our Ladye* 165 Before Complyn ye haue a collacion, where ys redde some spyrytuall matter of gostly edyfycacion. 1482 *Monk of Evesham* vi. 8. Extended to the light repast or refection taken by the members of a monastery at close of day, after the reading or conference mentioned in 7. (Many quotations combine senses 7 and 8.) Hence, in modern R.C. usage, A light repast made in lieu of supper on fasting days.

St. Charles .. only allows a glass of wine with an ounce and a half of bread to be taken as a collation on the evening of fasting days.

9. Hence, in *gen.* use, A light meal or repast: one consisting of light viands or delicacies (*e.g.* fruit, sweets, and wine), or that has needed little preparation (often 'a cold collation'). 'A repast; a treat less than a feast' (J.).

Originally applied to a repast between ordinary meals, and still retaining much of that character.

(The formation is parallel to that of Romanic sbs. in *-ata, -ada, -ée.*) In OF. it had the semi-popular form *coleite* (later *coloite*) whence ME. *collete*, as well as the learned *collecte*, adapted from the L. *collecta*, familiar in ecclesiastical use. 3. *Liturgical.* A name given to 'a comparatively short prayer, more or less condensed in form, and aiming at a single point, or at two points closely connected with each other', one or more of which, according to the occasion and season, have been used in the public worship of the Western Church from an early date. Applied particularly to the prayer, which varies with the day, week, or octave, said before the Epistle in the Mass or Eucharistic service, and in the Anglican service also in Morning and Evening Prayer, called for distinction the *collect of the day*.

As to the origin and history of the term, we are indebted mainly to the Rev. F. E. Warren, M.A., for the following notes: the Gregorian Sacramentary (ed. Muratori, 22, 28, 116) has in one place *oratio ad collectam*, and twice simply *collecta* (to which also the first is shortened in later copies), as the title of a prayer said at one of the appointed stations where the people *collected* in order to proceed together to the church where mass was said. Here the meaning was 'a prayer for (or at) the collection or gathering'. But of even earlier date is the use, in the Gallican liturgies, of *collectio*, passing later into *collecta*, as a title of prayers, especially those of the mass, in which the sense was evidently the *collecting* or summing up in a prayer of the thought sketched out in the *Rogatio* or *bidding*, or suggested by the *capitula* for the day. It was from this source that the term, as a more or less general equivalent for *oratio*, passed into the mediæval French and English missals and breviaries (see *Paris Brev.* 1836, *Rubricæ Generales* xii; *Rituale Dunelmensis* (Surtees Soc.) *passim*; *Sarum Breviary* (ed. 1882), Index, *Sarum Missal* (Burntisl. 1861) 3; *Hereford Missal* p. xxxv; *York Missal* (Surtees) I. 169, etc.), and thence, again, into the Book of Common Prayer, where it is the title of such prayers as were taken directly from the Breviary or other Service-books of the Sarum use, and of new compositions of the same type. Neither *collecta* nor *collectio* occurs as a title, or in a rubric, in the Roman Missal or Breviary, or in any authorized Roman Service-books; but the term is popularly applied, at least in France and England, to 'the prayer in the Mass, after the Gloria and before the Epistle' (see *Catholic Dict.* s.v.; also Littré).

It does not appear that there was any original connexion between the Roman and Gallican uses of *collecta* here mentioned; but from an early period etymologizing writers tried to connect them, so as to derive the collect from both at once: see the *Micrologus* (*c* 1100) iii, of Gallican authorship, Joh. Bekethus *Divin. Offic. Explicatio* (*a* 1200) xxxvii, Durandus *Rationale Div. Off.* (*a* 1300) IV. xv. §13; see also *Dict. of Christian Antiq.* s.v., and Canon Bright 'On the Collects' in the *Prayer-Book Commentary* (S.P.C.K.).

It now usually admits students not on the foundation who pay to enjoy the advantages of common life and supervision with the scholars of the foundation, during their university or school course.

In the English Universities, the name *college* was app. not originally given to the foundations of the Earliest Period (e.g. *Merton*, *Balliol*), but was introduced with the new foundations of the Second Period (typified by New College, Oxf.), which were really colleges of clergy, in sense 3, but with special aims in connexion with study. With the introduction of these 'colleges' into the university system, the name spread from them to the older non-clerical foundations, and was taken in turn by those of the Third Period, the colleges of the Renascence.

Of the foundations under b, some (as those of Winchester and Eton) were originally associated with colleges in a university, others (as Gresham College, London, Dulwich College) had no such relations. When the education of the young was the object in view, such colleges have, in England, usually developed into great public schools.

c. From the fact that in some Universities only a single college was founded or survived, in which case the university and college became co-extensive, the name has come, as in Scotland and the United States, to be interchangeable with 'university'; 'a college with university functions'.

In U.S. 'college' has been the general term, and is still usually applied to a small university (or degree-giving educational institution) having a single curriculum of study, the name 'university' being given chiefly to a few of the larger institutions, which in their organization, and division into various faculties, more resemble the universities of Europe.

d. From the relation in which the colleges in a. stand to a univeristy, as places of residence and study recognized by it, the name has been officially extended to 'Any institution for higher education affiliated to a university': such are the various colleges affiliated to the University of London, or to Victoria University, the Queen's Colleges in Ireland, etc.

e. By another extension, the name is given to institutions unconnected with a university, for instruction of a more advanced or professional kind than that given at school, such as the theological colleges of religious organizations, colleges for women, training colleges for teachers, military and naval colleges, colleges of agriculture, music, etc.

For these, *Academy* was the general name down to the 19th c. The *Royal Naval Academy* at Portsmouth was reconstituted as the *Royal Naval College* in 1806; and in 1805 was founded the *East India College, Herts*, to prepare for the service of the East India Company.

collegialism (kə'li:dʒɪəlɪz(ə)m). [f. prec. + -ISM.] A name of German origin (= *collegialismus*, *collegial system*) for the theory of ecclesiastical polity which maintains that the (or a) visible church is a purely voluntary association (*collegium*) formed by contract, in which the supreme authority rests with the whole body of the members; and that the civil magistrate has no other relations to the church than those which he has to any other voluntary association within his territories.

Opposed to *episcopalism* which places the supreme authority in a clerical order, and *territorialism* which ascribes it to the civil power, making the regulation of the church in any country entirely a function of the state. (Formulated under the name by Pfaff in 1742.)

colloid ('kɒlɔɪd), *a.* and *sb.* [f. Gr. κολλο- comb. form of κόλλα glue + -ειδης -form: see -OID.]

A. *adj.* Of the nature or appearance of glue.

1. *Path.* c*olloid substance, tissue, matter, corpuscles, spheres*: a homogeneous or slightly granular gelatinous substance into which the cells are changed in certain forms of degeneration of tissue (c*olloid degeneration, metamorphosis*). c*olloid cancer*: a form of cancer in which colloid degeneration takes place.

1847-9 TODD *Cycl. Anat.* IX. 118/2 A form most distinct in..colloid cancer and fibrous tumours. **1870** T. HOLMES *Syst. Surg.* (ed. 2) I. 576 A section of the tumour exhibited the simplest colloid structure. **1876** tr. *Wagner's Gen. Pathol.* 329 Colloid metamorphosis consists in the transformation of tissues into a completely homogeneous, colorless or faint yellow, dull, translucent, sometimes fluid or soft, glue-like..substance.

2. *Chem.* Applied by Graham, 1861, to describe a peculiar state of aggregation in which substances exist; opposed to *crystalloid.* Substances in the colloid state are characterized by little or no tendency to diffuse through animal membranes or vegetable parchment, do not readily crystallize, are inert in their chemical relations, but are highly changeable. So called

because gelatin may be taken as the type of the class.

1861 T. GRAHAM in *Phil. Trans.* (1862) 184 *note*, Certain liquid colloid substances are capable of forming a jelly and yet still remain liquefiable by heat and soluble in water. Such is gelatine itself. **1862** H. SPENCER *First Princ.* II. xiii. (1875) §101 Matter has two solid states, distinguished as crystalloid and colloid; of which the first is due to union of the individual atoms or molecules, and the second to the union of groups of such individual atoms or molecules. **1869** MRS. SOMERVILLE *Molec. Sc.* I. iii. 110 Solutions of.. crystalloids pass freely through colloid substances, such as parchment..and membrane, into water, though they have no pores.

3. *Min.* One of the forms in which minerals occur: see quot.

1879 RUTLEY *Study Rocks* x. 152 This condition as intermediate between the crystallised and the colloid forms of silica. **1885** GEIKIE *Geol.* II. II. ii. 62 Minerals..occur in four conditions, according to the circumstances under which they have been produced..1. Crystalline..2. Vitreous..3. Colloid, as a jelly-like though stony substance, deposited from aqueous solution. The most abundant mineral in nature which takes the colloid form is silica..4. Amorphous.

B. *sb.*

1. *Path.* The colourless or yellowish transparent jelly-like substance formed in colloid degeneration; also a similar substance found normally in the thyroid gland.

1849-52 TODD *Cycl. Anat.* IV. 1116/2 But no example of colloid in it [thymus gland] has yet been detected. **1874** JONES & SIEV. *Pathol. Anat.* 126 Colloid is related to the albuminates, and resembles mucin.

2. *Chem.* (mostly *pl.*) A colloid body or substance, as distinct from a crystalloid: see A. 2.

1861 T. GRAHAM in *Phil. Trans.* (1862) 183 [see COLLOIDAL 1]. **1869** MRS. SOMERVILLE *Molec. Sc.* I. iii. 109 Substances such as salts, sugars, etc., are much more diffusible than colloids or amorphous sticky bodies, such as gum, caramel, jellies. **1880** BASTIAN *Brain* i. 5 It is known.. that certain typical colloids may, under some conditions, be converted into crystalloids.

colloidal (kə'lɔɪdəl), *a.* [f. prec. + -AL¹.]

1. *Chem.* Of, pertaining to, or of the nature of a colloid; in the condition constituting a colloid.

1861 T. GRAHAM in *Phil. Trans.* (1862) 183 It is proposed to designate substances of this class as *colloids*, and to speak of their peculiar form of aggregation as the *colloidal condition of matter*. *Ibid.* 184 The colloidal is, in fact, a dynamical state of matter: the crystalloidal being the statical condition. **1876** B. W. RICHARDSON in *Gd. Words* 788 The muscle-forming food, called sometimes.. because it assumes in the organism the colloidal or jelly-like state, colloidal food.

2. *Min.* = COLLOID *a.* 3.

1864 H. SPENCER *Biol.* I. 16 The mineral forms of silicic acid..are often found to have passed..from the vitreous or colloidal into the crystalline condition. **1885** GEIKIE *Geol.* II. II. ii. 62 Chalcedony, doubtless originally colloidal silica.

Hence **colloi'dality**, the colloidal state.

1861 T. GRAHAM in *Phil. Trans.* (1862) 221 Whether the basis of colloidality may not really be this composite character of the molecule.

colonel ('kɜːnəl), *sb.* Forms: *α.* 6 coronelle, corronel, 6–7 coronel(l, 7 -all, corronell; *β.* 6–7 colonell, 6–8 collonell, (7 colenel), 7–8 collonel, 6– colonel. [In 16th c. *coronel*, a. F. *coronnel* (also *coronel*, *couronnel*, and later *colonnel*), ad. It. *colonnello*, *colonello* chief commander of a regiment, f. *colonna* COLUMN: cf. *colonnello*, *colon(n)ella* 'a little columne or piller' in Florio; also *la compagnia colonnella*, Fr. *la compagnie colonelle*, or simply *la colonelle*, the first company of a regiment of infantry. 'The colonel was so called, because leading the little column or company at the head of the regiment' (Skeat). The early Fr. *coronel* (whence also Sp. *coronel*) was due to the dissimilation of *l–l*, common in Romanic, though popular etymology associated it with *corona*, *couronne* crown. It is still dialectal (see Littré), but was supplanted in literary use, late in 16th c., by the more etymological *colonnel*; and under this influence and that of translations of Italian military treatises *colonel* also appeared in Eng. *c* 1580. The two forms were used indifferently by Barret, Holland, Decker, and others; *coronel* was the prevailing form till 1630, but disappeared in writing *c* 1650. Of 89 quots. examined before this date, 56 have *coronel*, 33 *colonel*, thus distributed: up to 1590 *coronel* 21, *colonel* 1; 1591–1630 *cor-* 31, *col-* 22; 1631–50 *cor-* 4, *col-* 10; 1651– *cor-* 0. In 17th c. *colonell* was trisyllabic, and was often accented (in verse) on the last syllable. But by 1669 it began to be reduced in pronunciation to two syllables, *col'nel* (according to Jones *Pract. Phonography*, 1701, ('kʌlnəl)), as recorded by Dr. Johnson 1755–73, and repeated without remark by Todd 1818; in Farquhar's *Sir Harry Wildair* (1701) it appears familiarly abbreviated to *coll.* But app. the earlier *coronel* had never died out of popular use; Dr. A. J. Ellis *Eng. Pronunc.* 1074/2 cites Dyche 1710 for ('kʌrəʊnɛl), Buchanan 1766 for ('kɔːnɪl), Sheridan 1780 for ('kɜːnɛl) the pronunciation now established, though apparently not yet universal in 1816. colony ('kɒlənɪ), *sb.* Also 6-7 colonie, 7 collony. [ME. *colonie*, ad. (partly through OF. *colonie*) L. *colōnia*, f. *colōn-us* tiller, farmer, cultivator, planter, settler in a new country.

L. *colōnia* had thus the senses of 'farm', 'landed estate', 'settlement', and was esp. the proper term for a public settlement of Roman citizens in a hostile or newly conquered country, where they, retaining their Roman citizenship, received lands, and acted as a garrison, being mostly formed of veteran soldiers who had served their time; hence it was applied to the place so occupied, or to towns which were raised to the same rank and privileges. Among the nine Roman *coloniæ* in Britain, were London, Bath, Chester, Lincoln. The Roman writers further used their word *colōnia* to translate Gr. *ἀποικία* a settlement of *ἄποικοι*, lit, 'people from home', *i.e.* a body of emigrants who settled abroad as an independent self-governed *πόλις* or state, unconnected with the *μητρόπολις* or mother city save by religious ties. But in later Greek it was app. felt that the *ἀποικία* was not properly equivalent to the Roman *colōnia*, which was therefore used untranslated as *κολωνία* (Acts xvi. 12). It was esp. in reference to the Roman *colōniæ* that the word made its first appearance in the mod. langs., as in 14th c. French in Bercheure (see Littré). In Eng., Wyclif used it in Acts xvi. 12, but this was app. a mere literalism, and was not continued in the 16th c. versions. Its modern application to the planting of settlements, after Roman or Greek precedents, in newly discovered lands, was made, in the 16th c., by Latin and Italian writers, whose works were rendered into English by Richard Eden.]

I. As a property or quality.

1. The quality or attribute in virtue of which objects present different appearances to the eye, when considered with regard only to the kind of light reflected from their surfaces.

The particular colour of a body depends upon the molecular constitution of its surface, as determining the character and number of the light-vibrations which it reflects. Subjectively, colour may be viewed as the particular sensation produced by the stimulation of the optic nerve by particular light-vibrations. This sensation can also be induced by other means, such as pressure of the eye-ball, or an electric current.

2. a. A particular hue or tint, being one of the constituents into which white or 'colourless' light can be decomposed, the series of which constitutes the *spectrum*; also any mixture of these. In speaking of the colours of objects, *black* and *white*, in which the rays of light are respectively wholly absorbed and wholly reflected, are included.

Often used spec. of a hue or tint distinct from the prevailing tone, which may be black, white, or some positive colour. Thus in *Bot.* it is specifically used of any hue save green, 'white being regarded as a colour, and green not' (*Treas. Bot.* 1866).

accidental colours, *complementary* c.: see these words.

colour of brightness: a yellowish colour resulting from increased illumination.

constants of colour: numbers for the comparative measurement of the purity, brightness and hue of colours.

ecclesiastical or *liturgical colours*: the colours used in church-decoration or in ecclesiastical vestments.

'colour-blind, *a.* Unable to see certain colours; unable to discriminate between individual colours, or shades of colour.

(The strict meaning ought to be 'blind to colour' as a whole; but as this rarely exists (except in the case of the totally blind), the term is applied with much laxity to any constitutional inability to discriminate between colours, the common type being inability to distinguish the red and the green rays of the spectrum from each other.)

1854 MACKENZIE *Dis. Eye* (ed. 4) 948 It seems probable that yellow glasses will prove of use to colour-blind persons. 1866 HUXLEY *Phys.* ix. §8 Such colour-blind persons..are unable to distinguish between the leaves of the cherry-tree and its fruit. 1878 BROWNING *La Saisiaz* 39 Here's my neighbour colour-blind, Eyes like mine to all appearance.

b. *fig.* Taking no note of differences in racial colour, in sex, etc.

'colour-'blindness. a. The condition of being colour-blind; a visual defect, consisting in inability (greater or less) to discriminate between different colours, or shades of colour.

This optical defect was first described by Dalton in 1794 (*Mem. Lit. & Phil. Soc. Manchester* V. 28), and was for a considerable time known scientifically as *Daltanism*. The accuracy of the words *colour-blind* and *colour-blindness* has often been impugned; in scientific use *achromatopsy* occurs; J. Dixon *Diseases af the Eye* (1859) 279 suggested the term *acritachramacy* (ἀκριτο-χρωματία), with its adjective *acritachramatic*.

1844 D. BREWSTER in *Phil. Mag.* XXV. 140 We regret much that Prof. Wartmann has continued the offensive name of Daltonism in his memoir on colour blindness... We have used the word Colour blindness, because it indicates simply blindness to one or more colours. 1854 MACKENZIE *Dis. Eye* (ed. 4) 946 Colour-blindness has been detected much oftener in males than in females. 1855 BAIN *Senses & Int.* II. ii. 3 (1864) 236 Colour-blindness has been known to exist with reference to green, but as yet, not to violet. 1876 FOSTER *Phys.* (1879) III. ii. 491 The most common form of colour-blindness is that of persons unable to distinguish green and red from each other.

b. *fig.*

PATTERSON *Schumann* viii. 128 Musicians are usually accredited with a lack of the nobler feelings of generosity towards each other—that colour-blindness which can allow no rival to the 'ego'. 1962 *Economist* 28 Apr. 360/1 The capital's racially integrated schools provide a good example of colour-blindness.

com-, *prefix* of Lat. origin. The archaic form of the preposition which in classical L. was as a separate word written *cum*; *com-* being retained in combination before the labials *b*, *p*, *m*, and before a few words beginning with vowels, as in *comes*, *comit-*; the *m* was assimilated before *r* as *corruptus*, in later times also before *l* as *collectus*; dropped before vowels generally, *h* and *gn-*, as *coalescĕre*, *coercēre*, *cohabitāre*, *cognātus*; originally, also before *n*, as *cōnātus*, *cōnivēre*, but in later MSS. and texts assimilated, as *connātus*, *connivēre*; before all other consonants *com-* was changed to CON-, q.v. But in some English derivatives, *com-* has taken the place of L. *con-* before *f*, as in *comfort*. The sense is 'together, together with, in combination or union', also 'altogether, completely', and hence *intensive*. It occurs in combinations actually formed in Latin, their derivatives, and analogical extensions. The prefix has become a living English element in the form CO-, q.v.

In Provençal, Spanish, and Old French, *com-* before *m*, was regularly reduced to *co-*, e.g. *co-mandement*, *co-mence*, *co-mun*, and in this form these words were originally adopted in English (cf. COL-, CON-). But with the revival of Latin learning, the *m* was again doubled in spelling in French and thence in English; this scarcely, if at all, affects the pronunciation in an unaccented syllable, except that, when the word is uttered syllabically, or a factitious stress is for the nonce put on the first syllable, this is treated as (kɒm), or (kɒ-), and not as (kəʊ); it is here therefore symbolized by (kə-), though in ordinary utterance this is not distinguishable from (kəʊ-), *e.g.* (kə'mɪt) or (kəʊ'mɪt).

Before *b*, *p*, OF. had normally *cum-*, as in *cumbatre*, *cumpagnie*; although this was afterwards altered back to the Latin type *com-*, the original pronunciation remained in English, where its phonetic descendant still survives in *comfort*, *company*, *compass*, etc. But the influence of the spelling in modern times has been constantly to extend the use of (kɒm-) in all such words: ('kʌmbæt) is even now dying out before ('kɒmbæt).

coma[1] ('kəʊmə). [a. Gr. κῶμα (κωματ-) deep sleep, lethargy: cf. κοιμά-ειν to put to sleep.]

Pathol. 'A state of unnatural, heavy, deep and prolonged sleep, with complete unconsciousness and slow, stertorous, often irregular, breathing' (*Syd. Soc. Lex.*), due to pressure on the brain, to the effect of certain poisons, or other causes, and frequently ending in death; stupor, lethargy.

B. *sb.* A mason or builder belonging to this guild.

1899 'L. SCOTT' *Cathedral Builders* 5 The origin of the name *Comacine Masters* has caused a great deal of argument amongst Italian writers new and old. Some think it merely a place-name referring to the island of Comacina, in Lake Lario or Como; others take a wider significance, and say it means not only the city of Como, but all the province, which was once a Roman colony of great extension. Others again, among whom is Grotius, suggest that it is not a place-name at all, but comes from the Teutonic word *Gemachin* or house-builders. As the Longobards afterwards called them in Italian *Maestri Casarii*, which means the same thing, there is perhaps something to be said for this hypothesis. *Ibid.* 9 Rome is..full of remains of what is now styled Comacine architecture. *Ibid.* 17 There is no certain proof that the Comacines were the veritable stock from which the pseudo-Freemasonry of the present day sprang. **1900** *Monthly Rev.* I. 103 The Comacine masters have their existence sufficiently proved by..the edict of Rotharis (dated 653). *Ibid.* 104 The collegiate and Comacine constitutions.

2. a. The ordinary term in scientific use.

As all ordinary combustion consists in the energetic combination of a body with oxygen, with evolution of heat and light, this was alone contemplated in earlier definitions of the term; but since it has been known that similar phenomena attend the combination of other elements, *e.g.* that of hydrogen and metals with chlorine, bromine, and iodine, *combustion* has been defined more generally as 'The development of light and heat accompanying chemical combination'. ***internal combustion engine***, etc.: see INTERNAL *a.* 5.

Formerly, oxygen was regarded as essentially the *supporter of combustion*, the bodies which burned in it being called *combustibles*. Afterwards the former term was extended to all substances capable of forming vapours in which others can burn, as chlorine, bromine, iodine, sulphur; but since the same substance may sometimes act in both capacities, and since the vapours in question are actually consumed in the process, as truly as the so-called 'combustible', the distinction has gradually become obsolete. (Watts, etc.) Cf. COMBURENT.

b. In the sense of 'combination of a body with oxygen', the word has been applied to processes of oxidation unaccompanied by evolution of light, and not popularly considered as 'burning', such as take place in the tissues of organisms (*internal combustion*), in decomposing organic matter, etc.

Jrnl.* IV. 561 Every combination of an acid with other substances, is a process of combustion, which cannot take place without the combination of the oxygen with the combustible element. **1878** HUXLEY *Physiogr.* 80 A kind of slow combustion goes on in the body. **1882** VINES *Sachs' Bot.* 722 The decomposition of the non-nitrogenous reserve material and its combustion into carbon dioxide and water. **1882** *Syd. Skr. and Zend. *gam*, Gr. *βαίνω* (:—**βάνjω*:—**gwmjo-*), L. *venio* (:—**gwemjô*), etc.

The present tense had two stem-forms in Teutonic, viz. *kwem-* and *kum-*, repr. pre-Teutonic *g*^{w}*em-*, *g*^{w}*m-*, respectively; the latter being commonly considered an 'aorist-present'. Of these, Gothic shows only the former; OHG. shows both; OE. only the *kum-* stem. The OE. *cum-* has remained to the present day, being regularly represented by the current kʌm (in north. Eng. kʊm); the spelling *cum* was also frequent to 17th c., but the ME. scribal usage of writing *o* for *u* before *m*, *n*, *u* (*v*), introduced in 13th c. the spelling *come*, which finally prevailed: cf. *some*, *son*, *tongue*, *love*, etc. This use of *o* in ME. alike for the *u* of the present and pa. pple., and the *ō* of the past, was a defect of the writing which needs to be kept in mind.

The pa. t. had in WGer. the typical forms *kwam*, *kwâmun*; in OE., as in the parallel vb. *niman* to take, the long vowel of the plural was taken into the sing., giving *cuóm*, *cuómon*, later *cóm*, *cómon*, which in southern Eng. lived on through the ME. period as *cōm* (*coom*, *come*), *cōmen* (*cōme*, *coome*, *coom*). But just as, in late WS., *nóm*, *nómon*, became *nam*, *námon*, so in late Northumbrian *cóm*, *cómon* appear to have become *cam*, *cāmen*, which are found in the earliest specimens of northern ME. These forms were used by Wyclif, and soon afterwards drove out *com*, *come*, which hardly appear after 1500 in the literary language, though still widely prevalent in midland and southern dialects. In northern dialect, the pronunciation is still (kam), but in standard Eng. it has duly passed into (keɪm); cf. *Cambridge*.

The pa. pple. *cumen* was used by some down to the 17th c., when it was still written *comen*, *com'n*. As usual, however, the final *n* began to be lost in the 13th c. (esp. in the form with prefix *ycomen*, *ycome*), whereby this part was at length levelled with the infinitive as *come*. Notwithstanding a strong tendency in 16-17th c. to conform it to the weak conjugation as *comed* (a form which has established itself dialectally, *e.g.* in south of Scotland), the clipt form *come* (kʌm) remains that of standard English.

In OE., umlaut forms of the present stem occurred in the normal 2 and 3 sing. *cymes(t)*, *cymeð*, *cymþ*, which survived in early ME. *kimest*, *kimeð*; also in the pres. conj. *cyme*, and in

the pa. pple. *cymen* (:—**kumino*-); in ONorthumbrian, umlaut forms were more or less frequent all through the present stem, but these do not appear in ME. (See Sievers in *Paul u. Braune's Beitr.* VIII. 81.)

The perfect tenses were originally formed with the auxiliary *be*, which is still retained to express the resulting state; in the expression of action *have* has gradually displaced *be*: see BE *v.* 14 b.]

B. Signification.

gen. An elementary intransitive verb of motion, expressing movement towards or so as to reach the speaker, or the person spoken to, or towards a point where the speaker in thought or imagination places himself, or (when he is not himself in question) towards the person who forms the subject of his narrative. It is thus often used in opposition to *go*, although the latter does not primarily involve direction, and is often used without reference thereto. *Come* is also used merely of the accomplishment of the movement, involved in *reaching* or *becoming present* at any place or point; and sometimes the entrance upon motion, involved in *issuing* from a source, is alone, or at least chiefly, thought of (cf. 11).

It is rarely *quasi-transitive* by ellipsis: see VI.

I. Of motion in space.

* *of actual motion.*

1. In its most literal sense it expresses the hitherward motion of a voluntary agent.

a. To move towards, approach.

3. *Constructions.*

a. With *prepositions.* The preposition naturally following *come* is *to*; instead of which, however, there may stand any other of more complex sense, in which the notion *to* is contained or involved, as *into*, *unto*, *towards*, *against*, *on*, *upon*, *about*, *around*, *beside*, *near*, *above*, *beneath*, *before*, *behind*, *over*, *under* the point of direction; *before* a person, a tribunal, etc.

Beside the notion of *to* expressed or understood, relations of other kinds may be considered; and these sometimes become the only ones actually considered or expressed, e.g. *from* the point left, *across*, *along*, *through*, *by*, *over*, *under*, *up*, *down* a route followed or things passed, *with* a companion or accompaniment, *by*, *in* a conveyance, *for* a thing wanted, *after* a person or thing followed or sought.

Barton* xviii, I'll come with you. **1875** JOWETT *Plato* (ed. 2) V. 524 The stranger who comes from abroad.

¶ The collocation of *come* with a particular preposition has often a specialized sense: e.g. *to come by* (a thing) = to acquire. For these see VIII.

b. *Come* may be followed by the *infin. of purpose*, with *to* (formerly sometimes preceded by *for* as still in vulgar use).

†comel, cumel. *Obs. rare.* Found only in Layamon, in the dat. plural, *on* (*inna, of*) *comelan, comlen, comela, -le, cumelan*, = In (from) tents or (?) temporary coverts.

The later text actually substitutes in one place 'in teldes' = in tents; in Wace the word was generally *buschement.*

c **1205** LAY. 6630 Þer he hundede on comelan [*c* **1275** was an hontinge] wiþ his hird-iferen, i þon wude of Kalatere. *Ibid.* 11008 Þat Coel þe king seoc lai an comlen [*c* **1275** in comelan]. *Ibid.* 20272 Þat heo comen bihalues þer Baldulf lai on comele [*c* **1275** in teldes]. *Ibid.* 20905 Childric com of comela to Arðure þan kinge. *Ibid.* 30400 þer þe king Cadwaðlan wunede on cumelan [*c* **1275** comelan].

[Doubtfully conjectured to be identical with OE. *cumbol* = OS. *cumbal*, OHG. *chumpal*, ON. *kuml*, a word orig. meaning 'signum', sign, token, mark for recognition, but in OE. esp. = military sign, ensign, banner. In composition, the notion was transferred to 'war' and its circumstances, as in *cumbol-haga*, 'war hedge', phalanx, *cumbol-hete* warlike hate, *cumbol-wiga* warrior; so that *on cumelan* in Layamon, might possibly have come to be 'in warlike array, in the ranks of war, in camp, in tents'. But the form of the word suggests that the ON. rather than the OE. was the immediate source of *cumel, comel*, and a chief sense in ON. was 'monument, memorial, cairn, or how', whence 'cairn' simply, and in mod. Icel. 'a low hay-rick'; and it has been thought possible that a sense 'temporary shelter', or even 'tent' might arise in this way.]

comely ('kʌmlɪ), *a.* Forms: 1 cýmlíc, 3 cumelich, 4 comliche, -lych, com-, kom-, cumli, 4-6 cumly, 4-7 comly, 5 comeliche, coum-, commly, 6 cum-, cumelie, com-, comeli, 6-7 comelie, 4- comely. *Compar.* 4 comelokur, 5 comlyar, 6- comelier. *Superl.* 4 comlokest, 5-7 comliest, 7- comeliest. [OE. *cýmlíc*, f. *cýme* exquisite, fine:—WGer. *kûmi-* + *-líc*: see -LIKE, -LY[1]. OE. *cýme, cýmlic*, appear to have the sense 'beautifully constructed', 'fine', 'handsome'; but the cognate OHG. adv. *chûmo*, mod.G. *kaum*, means 'with trouble or difficulty, hardly', Fr. *à peine*, the MHG. adj. *kûm, kûme* = frail, weak, and the deriv. OHG. *chûmíg* = weak, delicate, sickly; cf. the ME. KIME weak, silly, and AKIMED. These various developments of use appear to indicate for WGer. *kûmi-* a general sense of 'delicate', as applied to workmanship or to constitution; perh. going back to the notion of 'elaborate, made with trouble or difficulty'. (See however Kluge in Paul u. Braune's *Beitr.* XI. 557.) In English, nearly the whole range of meaning during the historical period is covered by the modern colloquial use of 'nice' *i.e.* pleasant to the sight ('nice-looking'), pleasant to have to do with, pleasing to the moral sense, or æsthetical faculty, to the sensations or perceptions generally. The sense-development is also largely parallel to that of the same word. The original long vowel of *cýmlíc* (see Sievers, *Beitr.* X. 497) was subsequently shortened by position, and *cymlíc* was thus brought into association with the *cym-* forms of *cuman* to COME, so as to be made at length *cumli, comly*; along with this went a gradual modification of the sense, introducing the notion of 'becoming'. It is noticeable, however, that MHG. had *komlich, komenlich*, and early mod.Du. *komlick, komelick* (Kilian), as actual derivatives of *komen*: cf. also L. *conveniens*, OF. *avenant.*]

command (kə'mɑ:nd, -æ-), *v.* Forms: 3-5 comaund(e, 3-6 comand(e, 3-7 commaund(e, -ande, (4 comandi, komand(e, 5 co(m)mawnd, -ound, -awunde), 3- command. Also 3 cumaund, 3-5 -and(e, (5 cummawunde). *Pa. t.* and *pple.* commanded, (formerly, 4 cumand, komande, 4-5 comand(e, -aund(e, 5 commaunde). [ME. *coma(u)nde-n*, a. OF. *cumande-r, comande-r* (= Pr., Sp. *comandar*, It. *commandāre*):—late L. or Romanic *commandā-re*, f. *com-* intensive + *mandāre* to commit, give in charge, enjoin.

The primary sense of L. *mandāre* (f. *manus* hand + *dare* to give) was 'to give into any one's hand or charge', a sense retained by the ancient compound *commendāre* to COMMEND, the vowel-change in which shows its prehistoric antiquity. In late historic times, new compounds were formed on the type of the simple verb, as *demandāre, remandāre*, and in still later, *commandāre*, which also took the later sense of the simple *mandāre*, 'to order, enjoin'. *Commendāre* and *commandāre* occur indiscriminately, in both senses, in med. Latin (see DuCange). In OF. *cumander, comander* was both 'to commend' and 'to command'; and so in ME. Subsequently the former sense became obs. in both: in Fr. being taken up by the new compound *recommander*; in English for this sense *commend* was taken afresh from Latin, and *recomaund* at length assimilated to it as *recommend.*]

I. *Simple sense. trans.* To order, enjoin, bid with authority or influence. Properly said of persons, but also *fig.* of things.

The original complete construction was with accusative of the thing enjoined and dative of the person to whom the injunction is given: L. *hoc tibi mando, commendo*; Fr. *je le lui commande.* In ME. the dative was sometimes expressed by *to*, 'all thingis that I comaunde to thee', but usually without it; hence the construction was formally two objects, 'I command *thee this*', the distinction of which as indirect and direct, has tended in many cases to be lost sight of. Either object may be unexpressed, leaving the other apparently as the sole object. The original accusative is often represented by a clause or infinitive phrase, 'I command him *to come*, or *that he come*'; in which case the remaining personal object is apt to be viewed as direct, although it is historically a dative; cf. F. *commande aux esclaves de venir*, command (to) the slaves to come. Either object, if it be a sb. or pronoun, may become the subject in the passive voice; 'that which is commanded', 'he is commanded to go'.

1. *Naval.* An officer in command, ranking above captain and below rear-admiral.

a. in *Brit.* and *U.S.*

In the British navy the rank is a temporary one, given to senior officers in command of detached squadrons. It is of two classes, in the first of which the commodore (with the pay and allowances of a rear-admiral) has a captain under him, while in the second he has not.

In the U.S. navy (since 1862) the commodore may command a naval division or station, or a first-class warship.

The ME. repr. of the latter, IMENE, was superseded by the Fr. *comun*; the accentuation *co'mun* is found as late as the 16th c. in verse; but before

The former became the more popular in ME., and was written *co(m)mun*, *-on*, *-oun*, *-en*, *-yn*, *-in*, and finally like the adj., *còmmon*; it survived in some senses down to the 18th c. But the earlier senses mostly became obs. in the 16th c., with the exception of that of 'hold converse'; and here the form *commune*, which, though less usual in ME., had never become obsolete, now came to the front, being supported by the sb. *communion*, etc. *Common* and *commune* are thus only developments of the same word; but as they became very distinct in form, and their sense-history is not quite identical, *common* having taken from the cognate sb. and adj. some senses in which *commune* is never used, they are dealt with as distinct words.]

6. In some English colleges, as at Oxford and Winchester: One who pays for his commons, *i.e.* a student or undergraduate not on the foundation (called at Cambridge a *pensioner*).

The colleges were originally intended only for the fellows and scholars 'on the foundation', the admission of other students, as 'commoners' or boarders, being a subsequent development, which eventuated in the recognition of many ranks of students, as (at Oxford) *noblemen*, *gentlemen-commoners*, *fellow-commoners*, *commoners*, *battelers*, *servitors*: q.v. These grades are now practically obsolete; and the only existing distinction is into *scholars*, or students on the foundation, and *commoners*. The latter word thus tends to be understood as = 'common or ordinary undergraduate', i.e. one who has not gained a scholarship, exhibition, or other special distinction.

Civil actions at law brought by one subject against another. Used chiefly in connexion with, or as a contraction of, *Court of Common Pleas*, the name of a court for the trial of civil causes, formerly one of the three superior courts of common law in England. This court, long seated at Westminster, was abolished in 1875; it was represènted by the *Common Pleas Division* of the High Court of Justice until 1880, when that division was merged in the King's (or Queen's) Bench Division.

In earlier times the name of the court appears in the form *Common Place*; like the synonyms *Common Bench*, *Common Bank*, *Court of C.B.*, used interchangeably with it down to 16th c., this name may have originally had nothing to do with the word *pleas* (? had it any reference to the *certo loco* of the Great Charter), but some confusion between *pleas* and *place* is evident at least in the 16th c.

commune: see COMMON *sb.* and *a.*

commune (kə'mju:n, 'kɒmju:n), *v.* Forms: 4-6 comune, 5 comewne, 3- commune. [ME. *comune*, a. OF. *comune-r*, to make common, share, f. *comun* COMMON *a.* As mentioned under COMMON *v.*, this specially represents those forms of the OF. vb. in which the stress was upon the *u*, as 3 sing. pres. *co'mune* (:—L. type *co'mmūnat*); the forms with the stress on the termination, e.g. *comu'ner*, (:—L. type *commū'nāre*, etc.) gave the ME. form *'comun*, *common*. The latter was long the prevalent type in Eng., though *co'mmune* never became obsolete; and in the 16th c., when the senses under I. became mostly obsolete, and those senses which were associated with *communion* survived, this became the accepted form. But a result of the two types *'common* and *co'mmune* remains in the two pronunciations *'commune* and *co'mmune*, of which the former is frequent in verse (Pope, Cowper, Wordsworth, Scott, Mrs. Browning; both forms are used by Shakspere, Milton, Tennyson).

(In early prose quotations it is often impossible to say how *co(m)mune* was stressed. Hence some of the early quots. here placed, may belong to COMMON vb., as do all those spelt *comun*, *comen*, *comyn*, *comon*.)]
